

AGRICULTURAL CROPS AND LIVESTOCK 1992/93

MATALE DISTRICT PRELIMINARY REPORT

Department of Census and Statistics
Ministry of Policy Planning and Implementation

Preface...

A survey on Agricultural crops and Livestock was undertaken by the Department covering fifteen districts in six provinces namely: Western, Central, Sabaragamuwa, North-western, Uva, and Southern during 1992/93 Maha season. It is intended to cover the rest of the provinces during the course of 1994. Although this was named as a Survey, it could be considered a "Mini Census" as all the agricultural parcels growing crops other than paddy and those rearing Livestock were listed and enumerated in the survey operation. A similar exercise was also undertaken in 1979/80 by the Department. The survey was planned with a view to establish a frame of agricultural parcels for the future surveys and to get the extents under different crops and number of livestock, at lower administrative divisions as statistical inputs for regional development programs. In order to serve immediate needs of the users, information on certain items collected in the survey were summarized with the help of Grama Niladaris who acted as enumerators of the survey and they are published in this document as a series of district reports. Additional tables will be made available later, once the parcel-wise information are processed.

The planning, execution, and successful conclusion of the entire survey operation was performed by the staff of Agriculture division of the Department, under the close guidance and supervision of Mr. A.M. U. Dissanayake, Deputy Director and Mr. A.G.W. Nanayakkara, Additional Director.

I wish to express my thanks to Ms. D.D.M.V. Perera, Statistician who was responsible for co-ordination of all the phases of the survey, design of questionnaires and instruction manuals, and training of supervisors, Mr. A.J. Satharasinghe, Statistician who was responsible for preparing all tables in this report on micro pcs., and Mr. J. Dodangoda, Statistician who was responsible for distribution and collection of survey materials for the logistical operations.

I am confident that the information presented in this report will be of immense help to planners and policy makers.

A.A.D. Cyril Yasasiri.

Director of Census & Statistics.

Dept. Of Census & Statistics,
No. 6. Albert Crescent,

List of Tables

1. Agricultural parcels in Matale district by D.S. divisions & G.N. divisions	5
2. Area under seasonal crops in Matale district by D.S. divisions & G.N. divisions	20
3. Area under perennial crops in Matale district by D.S. divisions & G.N. divisions	37
4. No. of cattle and buffaloes in Matale district by D.S. divisions & G.N. divisions	70

Acknowledgement.

Many people have contributed for the successful completion of this survey in various phases. Therefore, my grate appreciation is due all those who were responsible for the smooth conduct of the survey. It is not practical to mention their names individually. However, some major contributions are mentioned here.

The Chief Secretary of the province, District Secretary, Divisional Secretaries/Additional Govt. Agents, Commissioner of Agrarian Services who made available the valuable services and co-operation of their supporting staff.

Mr. D. Amarasinghe, Deputy Director of my department who co-ordinated field Operation activities between the department and district. Grama Nilaris played the key role by visiting households and enumerating them as primary reporters of the survey.

District Statistical Officer Mr. D. Daluwatta and his team of Statistical Investigating Officers namely: Mr. K.G.F. Perera (Ambanganga Korale), Mr. M. somatilake (Dambulla), Mr. W.M. Jayaweera (Galewela), Mr. G. K. Anuragaminie (Laggala Pallegama), Mrs. A. Wijekoon (Pallepola), Mr. T.M. Myadunne (Rattota), Mr. W.P. Nawaratne (Matale and Yatawatta), Mrs. D.P.K. Karunaratne (Naula), Mrs. P.R.V. Munidasa (Ukuwela), Mr. A.G.A.B. Tennakoon (Wilgamuwa), Mr. W. Dissanayake and Mr. P.C.K. Gunaratne (Head Quarters) responsible for training, supervision and to provide the technical guidance to field staff in their respective Divisional Secretary Divisions assisted by Mr. S.B. Wimalasiri, Statistical Officer.

Officers of The Agriculture Division who carried out coding and data entry work under the supervision of Statistical Officers namely: Mr. J.A.D. B. Jayasooriya, Ms. K.D. Chandralatha, Ms. Karuna Kannangara, Ms. Champika. de. Silva, Mr.G.D.A.C. Ratnasekara.

Mr. K.D. Siripala, Deputy Director of Printing division and his team of staff for printing of this report in a short notice.

Mr. S.D. Rajapaksa, Cartographer and Mr. C.N. Galahitiyawa, Statistician for designing the cover page of the report.

Survey on Agricultural Crops and Livestock - 1993

(1) Background :

Recent trends in the concept of development planning, specially for rural sector, where source of livelihood heavily depend on Agricultural sector, emphasize the need for reliable statistical information disaggregated at lower administrative division levels. In this respect the emphasis has been made for more detailed information on land utilization associated with seasonal and minor export crops and their production levels. The dearth for these statistics have been growing more rapidly as a mean of poverty alleviation programs as well. These needs have made to adopt for more systematic and national approaches for the data collection on Agricultural Crops and Livestock.

The collection of information on perennial crops such as Tea, Rubber and Coconut is much easier and are readily available as a result of nature of the growing pattern of these crops and the management. Reliable and up-to-date information pertaining to these crops are also available through the means of Administrative records and Censuses. However, collecting reliable statistical information on other agricultural crops such as seasonal crops, fruit crops, minor export crops etc. has become a difficult and costly task due to scattered nature of many of these crops.

The nature of growing conditions of crops other than Tea, Rubber and Coconut do not permit to gather reliable information even through Agricultural Censuses. Therefore, such information could grasp only through well defined objective survey operations. In spite of these difficulties, the Department felt the increasing need for more realistic information on these crops which play a crucial role in the agricultural economy of small farmers and to fulfill the following objectives, the survey on Agricultural crops & livestock has been carried out during Maha Season 1992/93.

(2) Objectives :

- (a) To collect and provide up-to-date information on Agricultural crops and livestock at Grama Niladari (GNN) division and village level which are needed for planning at lower administrative levels.
- (b) To establish a frame on Agricultural crops and livestock, in order to conduct objective surveys that are expected to be undertaken in the future.
- (c) To make available the benchmark data needed to monitor the progress of the agricultural development programmes that are being implemented by the Government.

(3) Methodology

The survey operation could be considered as a "Mini Census" since all the parcels growing Agricultural crops and rearing livestock during the reference period, were listed and enumerated.

3.1 Reference period :

The reference period for the survey was Maha Season of 1992/93 (i.e. September 1992 - to April 1993).

3.2 Scope and Contents :

All the parcels growing Agricultural crops other than wet land paddy, were enumerated and listed in a special register. The extent under each crop, number of trees, creepers or bushes when the extents cannot be given, number of cattle and buffaloes were recorded. It was also recorded whether the parcel is a home garden or not.

Asweddumized paddy parcels were excluded in this survey. However, if there were asweddumized paddy parcels cultivated with Agricultural crops, other than paddy during the reference period, such parcels were enumerated to determine the crop acreage for the Maha Season 1992/93. The survey was not conducted within the limits of urban councils and Municipal Councils as they are predominantly residential areas.

3.3 Enumerators :

Grama Niladaris (GNN) of their respective divisions were the enumerators in this survey.

3.4 Field Organization :

The Statistical Investigators attached to Divisional Secretariates, provided the training and technical guidance to enumerators (GNN) and Divisional Officers (DOO), Agricultural Instructors (All) assisted in the supervision work and quality checks, under the Administrative control of Additional Government Agents/ Divisional Secretaries. District Statisticians/Statistical Officers attached to Kachcheri were responsible for all arrangements relate to the survey within their respective districts. They were working under the guidance of a Deputy Director of the Department who was coordinating the survey activities.

4. Concepts and Definitions

Some of the main concepts and definitions used and the method of determination of the area under crops are described below.

4.1 (a) Agricultural crops refers to all perennial crops and seasonal crops grown in the parcels.

4.2 **Parcel** : is defined to be a piece of land cultivated either singly or jointly and is separated by a similar land cultivated by other cultivators or a water way, public road, boundary, fence or other such limits. This could be a land cultivated at the time of data collection or prepared for cultivation during the season, irrespective of legal ownership.

Estates : When a large estate extents fallen to number of GNN divisions or several villages in the same GN division, the portion fallen to one village was treated as a separate parcel.

4.3 Home Garden

(a) A parcel of which land extent is less than or equal to 20 perches having some form of cultivation/ tends livestock and has a dwelling house was defined to be a homegarden.

(b) A parcel of land which has some form of cultivation/livestock the total area of which is more than twenty perches could also be a homegarden if the following two conditions are fulfilled.

(i) It has a dwelling house.

(ii) The produces of the parcel is mainly used for home consumption.

4.4 Extents under Crops :

In most parcels in Sri Lanka, the general pattern is mixed cropping. Even in large plantations, there are instances where mixed cropping has been under taken. Thus, estimating the acreage under various crops posses serious problems to the enumerator. This is specially so when numerous varieties are haphazardly

grown in a parcel. The problem is further aggravated as the density of the mixed cropping vary from parcel to parcel. In keeping those features in mind the following methods of estimation procedures have been used to give the extent in the case of mixed cropping.

- (a) method of total area allocated to principal crops.
- (b) Equal fraction for each mixed crop.
- (c) Estimating the area based on number of plants.

for example, Rubber and Cocoa are planted in a 10 acre plot (parcel) wholly and if it contains the recommended number of trees per acre for both the crops, the enumerator was instructed to record 10 acres for Rubber and 10 acres for Cocoa as well.

Sometimes the enumerators were not able to give the extent under each crop. separately when a number of crops are being cultivated in one parcel. In such instances they were instructed to count the number of trees, creepers or bushes grown in the parcel and the extent under each crop was estimated with the help of the table given below and the other crops based on the general knowledge of the farmers in respect of their divisions.

Recommended No. of trees, Creepers or Bushes for an acre

Code No.	Crop	Recommended No.	Code No.	Crop	Recommended No.
15	Manioc	4,800-6,000	55	Arecanut	1,200
42	Rubber	160 - 200	57	Plantain	300
43	Coconut	60	58	Papaw	450
44	Cocoa	450	59	Pineapples	14,000
45	Coffee	450	60	Oranges	100
46	Cinnamon	3,000	61	Mangoes	30
50	Pepper	680	62	Avacadopears	100
51	Cardamons	600	63	Limes	200
52	Cloves	100	64	Passionfruit	500
53	Nutmeg	80	65	Jackfruit	20-25
54	Cashew	35	66	Breadfruit	30
			70	Betel	6,000

5. Tabulations :

The enumerators have been instructed to prepare a summary sheet based on the information collected on number of homegardens, acreage under important crops grown in their divisions and number of neat cattle and buffaloes. Arrangements are being made to release the information from summaries to the users early in order to meet their data needs. More detailed tabulations will be made available later.

5.1 This report presents the basic information by Grama Niladari divisions and divisional Secretariates in the district, based on the summary information prepared by GNN.

5.2 The following informations are given in four major tables.

- (a) Number and extents of agricultural parcels and number of homegardens.
- (b) Extents under seasonal crops.
- (c) Extents under perennial crops.
- (d) Number of cattle and buffaloes.

5.3 If the reported extent under any crop for the entire district is reported to be less than 5 hectares was not taken into tabulations when the data for GN divisions are presented. However those extents have been taken into account when the data for Divisional Secretariates are presented in the tables.

5.4 Seasonal Crops :

Kurakkan, Maize, Sorghum, Meneri, Green gram, Cowpea, Soyabean, Black gram, Dhal, Gingelly, Ground Nuts, Manioc, Sweet Potatoes, Potatoes, Red Onions, Big Onions, Chillies, Mustard, Ginger, Turmeric, Tobacco (Cigarette/Beedi/Cigar/Chewing) Cotton, Mulberry, Leafy vegetables, Gherkin.

5.5 Perrenial Crops :

Tea, Rubber, Coconut, Cinnamon, Coffee, Cocoa, Pepper, Cardamons, Cloves, Nutmeg, Arecanut, Cashew, Oranges, Limes, Mangoes, Jak, Bread-fruit, Sugar-cane, Goraka, Tamarine, Plantain, Papaw, Pineapple, Passion-fruit, Betel, Kitul, Wood-apple, Beli, Pomegrenate (Delum), Rambutan, Amberella Mangosteen, grapes, Drumstick, Palm, Durian, Pears.

The crops that are not included in the above were treated under "other" category.
