

Dept. of Census and Statistics Website vulnerable

YOHAN PERERA

Websites of the Department of Census and Statistics could be vulnerable to a cyber attack, Information Technology Society of Sri Lanka (ITSL) warned yesterday.

Dept. of Census and Statistics Website vulnerable

ITSL President Rajeev Mathew told Daily Mirror that the websites of the Department are vulnerable to cyber attacks as its host server is not adequately guarded. "The Department should update the site and guard it

to stop cyber attacks," he said. "It is possible for a visitor to the website to access the host server and hack the sites and we have informed the relevant authorities to take action in this regard," he added.
