

Dept. of Census and Statistics requests public to cooperate with enumerators

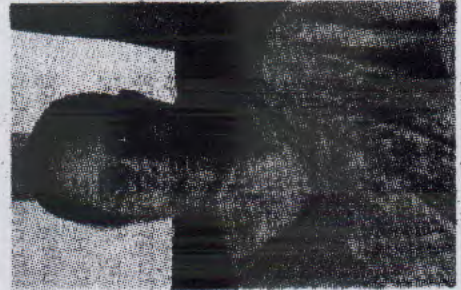

Census and Statistics Director General Anoja Seneviratne has called on the public to extend their cooperation to the enumerators visiting their houses for the ongoing census.

She said the public should not harbour fears in providing the necessary information to the enumerators who

visit their homes for census activities.

Following the reports that some households had not been providing information,

Seneviratne said that the census activities were expected to be concluded by 23 Dec.
