Preface

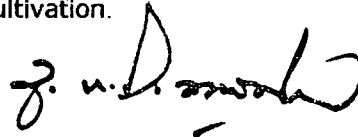

This publication gives the estimated extent under Coconut by Divisional Secretariat (D.S) and Grama Niladari Divisions (G.N) in Sabaragamuwa Province comprised of Administrative Districts namely; Ratnapura and Kegalle. This contains the statistics on Coconut extent tabulated on the basis of scanning and data processing of questionnaires of the Census of Agriculture 2002. Therefore, these data supersede the figures given in District-wise publications entitled "Status of Coconut Cultivation" issued earlier which were prepared according to the abstracts of Enumerators' Summaries. It has been noted that some manual errors have been occurred in those publications as such these data are to be treated as more accurate.

The total extent under Coconut reported for two districts in this Province at the Census of Agriculture 1982 was 30,714 acres in Ratnapura District and 50,456 acres in Kegalle District respectively with an aggregated figure for the entire province of about 81,170 acres or 32,849 hectares. The corresponding extent reported in the Census of Agriculture 2002 for these two districts was 39,458 acres in Ratnapura and 38,080 acres in Kegalle summing up to 77,538 acres or about 31,379 hectares. As such, the drop in Coconut extent in Sabaragamuwa province is reported to be about 5 % during last two decades.

My sincere appreciation is due to Ms. S. T. C. Gaveshika, Statistician and Mr. P. Nandasena, Statistical Officer for compiling this report under the direction of Mr. A.M.U. Dissanayake, Director in-charge of the Agriculture and Environment Statistics Division of the Department.

The data tabulations were performed by Mr. Migara Fernando, System Analyst/Programmer under the directions of Mrs. S.V. Nanayakkara, Director of Data Processing Division.

I hope that this report would be of immense help to the planners especially who are working in the agencies related with the development of Coconut cultivation.

A.G.W. Nanayakkara

INTRODUCTION

1. **Background:** The statistical information given in this document is based on the data collected through the Census of Agriculture conducted in the year 2002. The Census of Agriculture is an Island-wide operation for the collection and derivation of statistical information on the Country's agricultural structure, using "Agriculture Holding" as the unit of enumeration. The entire operation is carried out under the Census Ordinance by the Government of Sri Lanka.
2. **Data:** In this Census, the scope and content was mainly focused on the items such as (a). Agricultural Holdings, (b). Agricultural Operators, (c). Crop Extent, (d). Livestock numbers, (e). Land utilization, and (f). Agricultural machinery and equipment.
3. **Method of Data Collection:** For the operational point of view the entire agricultural sector in the country was divided in to two sectors namely, (a) Estate or large holdings (b). Small Holdings.
 - Estate Sector was defined as operational holdings or units of 20 acres or more in extent operated by an Individual or group of persons under one operational status, such as on own account, in-partnership, for a private person, or for an institution. In the instances where different parcels of the holding may add up to 20 acres or more, if so it was not considered an Estate. Estate should have at least one parcel of which the extent 20 acres or more.
 - Small Holding Sector was defined as all holdings, which are not falling into the category of estates.

The trained Enumerators visited each and every census unit in order of the list of Housing units, Institutions, Collective living quarters, and Non-housing units and screened out for Agricultural Operators through a schedule known as "AC 1." They have been instructed to conduct personal interviews with respective operators and collect the specific information required for this Census. While in respect of the estate sector, the information was collected through a mail questionnaire, which was addressed to every Estate Operator/Superintendent in accordance with the inventory of Estates prepared prior to the Census.

4. **Content in this document:** The data relating to Coconut cultivation which was collected at the census have been summarized and given here. They appear as follows.

Small Holding Sector:

- Extent of land (holdings) reported less than or equal to 40 perches (1/4 of an acre) having agricultural output mainly for home consumption: As these are very marginal land for the agricultural point of view, extent under a particular crop cannot be determined. Therefore, the Enumerators were instructed to report the basic information like number of trees/Bushes/creepers as appearing in those holdings with out going in to detail classifications. In respect of Coconut the information was collected on the followings.

(a). Number of Coconut trees (b). Number of King-coconut trees (both irrespective of production status).

- Holdings reporting extent more than 40 perches (1/4 of an acre) or producing agricultural output mainly for sale irrespective of land extent. The information was collected on the followings.

(a). Extent under Coconut viz. In-production, Not yet in-production

(b). If an extent under Coconut cannot be determined, then Number of scattered trees in-production, not yet in-production

(c). Number of King-coconut trees.

Note: Coconut extent by age was also collected but not analyzed here. However, they will be published in due course.

Estate sector:

- Similar information as in holdings above 40 perches.

(5). Limitations:

- It is important to note that the data given here on small holding sector by Grama Niladari divisions are based on the residence of the operators but not according to location of such holdings. However, at Divisional Secretariat division levels it is assumed that the difference between extent according to Operators' Residence and location of such holding are to be very marginal.

Note on this Publication:

- **This publication contains the statistics on Coconut tabulated on the basis of scanning of edited questionnaires of the Census of Agriculture 2002. Therefore, these data supersede the figures given in District-wise publications entitled "Status of Coconut Cultivation" issued earlier which were prepared according to the abstracts of Enumerators' Summaries. It has been noted that some manual errors have been occurred in those publications as such these data are to be treated as more accurate.**

RATNAPURA DISTRICT

A Brief Review

Ratnapura administrative district comprised with land area of about 799,616 acres (323,600 hectares) excluding inland waters. According to the Census of Agriculture 1982, there were about 335,382 acres (135,727 hectares) under agricultural activities which is about 41.9 percent of the total land area in the district. The extent under agriculture reported at the Census of Agriculture 2002 is 334,750 acres (135,471 hectares). This is about 42 percent of the total land area in the district and there is not an increase of agricultural area during last 20 years in the district. The total population enumerated in the Census of Population 1981 was 797,087 while the corresponding figure at the Census of Population 2001 is 1,008,164 and this is an increase of about 26.5 percent during 20 years period.

(1). Census of Population and Housing 2001 (2). Census of Agriculture 2002 *including Udawalawe part
(3). Asweddumized Paddy Extent reported in PI for Maha Season 2001/2002

The predominant crop cultivated in Ratnapura district is Tea extending over about 95,774 acres (38,759 hectares) and it contributes to about 27.2 percent of the total area under agriculture. The other important crops cultivated in the district in order of extent are Rubber about 53,544 acres (21,669 hectares), Paddy 52,318 acres (21,173 hectares), and Coconut 39,458 acres (15,968 hectares) respectively. These four crops are contributed to about 72 percent of the agricultural area in Ratnapura district.

According to the Census of Agriculture 1982, reported extent under Coconut was about 30,714 acres (12,430 hectares). Coconut cultivation in the district has shown substantial increase of about 39 percent during the last two decades. About 96 percent of the coconut acreage is found to be under small holdings and 50 percent of the Coconut area in the district is concentrated in four DS divisions namely; Embilipitiya, Weligepola, Godakawela, and Balangoda.

KEGALLE DISTRICT

A Brief Review

Kegalle administrative district comprised with land area of about 416,364 acres (168,500 hectares) excluding inland waters. According to the Census of Agriculture 1982, there were about 283,596 acres (114,770 hectares) under agricultural activities which is about 68.1 percent of the total land area in the district. The extent under agriculture reported at the Census of Agriculture 2002 is 249,091 acres (100,806 hectares). This is about 59.8 percent of the total land area in the district and the decrease of agricultural area during last 20 years is about 12 percent. The total population enumerated in the Census of Population 1981 was 684,944 while the corresponding figure at the Census of Population 2001 is 779,774 and this is an increase of about 13.8 percent during 20 years period.

Table: Population in 2001 and Extent under Agriculture in 2002

District Total	779,774	252,024	23,547	18,969	85,877	38,080	(15.1)

(1). Census of Population and Housing 2001 (2). Census of Agriculture 2002
 (3). Asweddumized Paddy Extent reported in PI for Maha Season 2001/2002

The predominant crop cultivated in Kegalle district is Rubber extending over about 85,877 acres (34,754 hectares) and it contributes to about 35 percent of the total area under agriculture. The other important crops cultivated in the district in order of extent are Coconut extending over 38,080 acres (15,411 hectares), Paddy 23,547 acres (9,529 hectares) and Tea 18,569 acres (7,515 hectares). These four crops are contributed to about 66 percent of the area under agriculture in Kegalle district.

According to the Census of Agriculture 1982, reported extent under Coconut was about 50,456 acres (20,419 hectares). Coconut extent in the district has shown a drop of about 25 percent during the last two decades. About 94 percent of the Coconut acreage is found to be under small holdings.

** Includes the estimated area covered by scattered coconut trees and excludes King coconut & Under Plantation

Estimation Procedure – Extent under Coconut

Small Holding Sector: This consists of three components	
Item	Extent (acres)
<ul style="list-style-type: none"> In the holdings more than ¼ acre where the extent under coconut can be reported in acres 	a1
<ul style="list-style-type: none"> In the holdings more than ¼ acre where the extent under coconut cannot be determined but number of trees were reported. Then the extent has been computed dividing the number of trees by 60. (Assumed that the number of trees cultivated per acre is 60). 	a2
<ul style="list-style-type: none"> In the holdings less than or equal to ¼ acre where the extent under coconut cannot be determined but number of trees were reported irrespective of status of production. Then the similar proportion of trees in-production and not yet in-production reported in the holdings more than ¼ in the same DS Division was used to estimate the number of trees in that category and divided by 60 to derive the extent. 	a3
Estate Sector: This consists of two components	
<ul style="list-style-type: none"> In the estate sector holdings where the extent under coconut can be reported in acres 	a4
<ul style="list-style-type: none"> In the estate holdings where the extent under coconut cannot be determined but number of trees were reported. Then the extent have been computed dividing the number of trees by 60. 	a5
<p>Likewise the total extent for a particular DS division was determined by taking the sum of above components i.e. (a1+a2+a3+a4+a5).</p>
