

SRI LANKA

**BULLETIN ON
MOTOR VEHICLE
STATISTICS 1978**

DEPARTMENT OF CENSUS AND STATISTICS
MINISTRY OF PLAN IMPLEMENTATION

P R E F A C E

The first issue of this publication was made available in 1978 when a systematic analysis of the data collected by the Statistics Division of the Department of Motor Traffic, was made in collaboration with the Data Processing Division of the Department of Census and Statistics. The analysis and processing of information collected in the course of the registration of Motor Vehicles have been continued uninterruptedly in subsequent years and a second issue of the Publication has therefore been made possible.

This issue contains nine Statistical tables which present the motor vehicle population of the country classified by Districts and by type, tare, payload, and other important variables. It is bound to be of considerably value to users of these statistics in both private and public sectors.

I wish to extend my very special thanks to Mr. M. A. L. S. N. Munasinghe, Commissioner of Motor Traffic for his interest and sustained efforts towards making this publication possible. It is expected to improve the scope and content of this publication in the future.

Any suggestions towards this end would be greatly appreciated.

W.A.A.S. Peiris,
Director of Census and Statistics.

Dept. of Census & Statistics,
P.O. Box 563,
Colombo 7.

25th March, 1982.

INTRODUCTION

The incessant demand for Motor Vehicle Statistics from diverse sources in recent years reflects, at least partly an increasing awareness of the need for improving the National Transport system to serve the requirements of a rapidly expanding economy. This Publication which updates the available information will in some measure satisfy this demand. It covers two main areas namely, goods and passenger transport.

The transportation of both consumer goods and the finished products of local industry has a profound effect, on the life of the people. Statistics of the National Lorry Transport Fleet are, therefore presented herein classified by administrative districts and by age-group, payload, tare and type of fuel used. The analysis covers all lorries registered under series IC, CV, 22 Sri, 24 Sri, 26 Sri, 33 Sri and 34 Sri.

Similarly, all passenger transport vehicles registered under series EY, EL, EN, 1 Sri to 11 Sri, 31 Sri and 50 Sri have been classified by administrative districts, by year of registration and by nature of ownership. It is hoped that this information will be of considerable use in the planning, implementation and evaluation of programmes for the development of goods and passenger transport services in the country.

The period prior to 1977 was characterized by a severe paucity in the imports of transport equipment. With the liberalization of imports towards the end of 1977, there has been an unprecedented increase in the importation of motor vehicles, spare parts and accessories. The material furnished in this Publication will, therefore, be useful in the evaluation of the impact of that policy on economic growth in this field.

This Publication has been made possible through the collective effort of the Statistics Division of the Department of Motor Traffic and the Data Processing Division of the Department of Census and Statistics. Definitions of some terms used in the Publication are given below:

1. Tare means the actual weight of a fully equipped motor vehicle when unladen, including the weight of accumulators but excluding the weight of any water or fuel.
2. Payload is the maximum weight of goods a motor lorry is permitted to carry.
3. Unspecified, where data is not available it has been grouped under unspecified.

Nimal Gunasinghe,
Statistical Officer,
Dept. of Motor Traffic,

25th March,- 1982.
