## P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Mannar is the fifteenth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

## CHAPTER - 1

### BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

#### 1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

##### SMALL HOLDING SECTOR

##### FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

##### SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

## 6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

### ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

### 1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

#### AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

#### AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

#### HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

1. It has a dwelling house.
2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

#### LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. Land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

#### SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

#### ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

#### REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

## A BRIEF REVIEW OF THE RESULTS

## 2.1 BACKGROUND

Mannar Administrative district located in the Northern province of Sri Lanka has a land area of about 490, 000 acres, (1985 Sq. Kilometers). According to the Census of Agriculture 1982, there were about 45,600 acres under Agricultural Activities in the district out of which 39,000 acres in the Small Holding Sector. Hence the district is bounded by sea to the west the Fisheries Industry is also one of the main occupations of its people. The entire district falls in the dry zone which has an annual average rainfall of 50 inches and annual average temperature of about 27° centigrades. This district comprised of 4 Assistant Government Agent divisions and one Electorate. The predominant crops are coconut and paddy accounted for about 2,800 acres 30,000 acres respectively according to the Census of Agriculture 1982.

A total of 106,235 persons were enumerated in Mannar district at time of Census of Population 1981, out of which 87 percent were concentrated in Rural Areas. The only Urban Centre in the district is in Mannar A.G.A. division concentrated 13 percent of the district population.

About 62 percent of the population is under 24 years of age and has a sex ratio of 114 males per 100 females.

The Geographical distribution of the population among the A.G.A. divisions in the district according to the Census of Population 1981 is given in Table 2.3. The density of the population in Mannar district is about 54 persons per square Kilometer and about 46 percent of the population live in Mannar A.G.A. division.

## 2.5 NUMBER OF OPERATORS AND AREA OPERATED

The number of operators and area operated by A.G.A. division is given in Table 2.5. The analysis of data pertaining to the Estate Sector has been given separately in the report on Estate Sector published in March, 1984. The present report deals with the analysis of data on small holding sector only. However some basic data on Estate Sector is given in the Annexure I of this report.

TABLE 2.5 : NUMBER OF OPERATORS AND AREA OPERATED

Sr. No.	A.G.A. Division	No. of Operators			Area Operated (Acres)		
		Estate Sector	Small Holding Sector	Total	Estate Sector	Small Holding Sector	Total
1	2	3	4	5	6	7	8

District Total		15	11,704	11,719	6,669	39,004	45,673

It is seen that about 81 percent of the operated area has been reported in three A.G.A. divisions namely Manthai West (33%), Musali (26%) and Nanattan (22%).

## STRUCTURE OF AGRICULTURE HOLDINGS (SMALL)

2.6 The average size of the holding in Mannar district is 3.34 acres as compared to Island average of 1.94 acres. (Table 2.6).

8. Fifty eight percent of the holdings are 2 acres and above in size and they account for about 93 percent of the area. About 25 percent of the holdings are 5 acres and above and they account for about 65 percent of the total operated area.

#### AGRICULTURAL OPERATORS BY AGE AND SEX

2.7 Almost half of the Agricultural Operators are in the Age Group of 25-44 years and another 23 percent of them are over 55 years of age.

In Mannar district about 10 percent of the Agricultural Operators are females.

#### AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

2.8 About 10 percent of the Agricultural operators have been reported under the Category of "No Schooling" while more than half of the operators have been reported as passed grade 5 or less.

## AREA OWNED

In Mannar District, It has been reported that about 9 percent of the agricultural operators do not own any land while 22 percent owned only home gardens but interms of the area it is negligible.

2.10 The distribution of operators owning land and the area owned is given in Table 2.10. Out of the area of 39,000 acres 36,000 acres have been operated on owned basis. There are about 7 percent of the land owning operators in the size class of 10 acres and above and they own 28 percent of the total area owned.

6	10 acres and above	6.7	4.1	5.7
		100.0	100.0	

About 67 percent of the operators not owning any land are in the size class of less than 1 acre.

2.12 Nearly 99 percent of the holdings and 98 percent of the area operated on own account basis.

TABLE 2.12 : NUMBER AND AREA OF OPERATIONAL HOLDINGS ACCORDING TO THE OPERATIONAL STATUS OF THE OPERATOR

#### CATEGORIES OF HOLDINGS

2.13 For Analytical purposes holdings were classified into three broad categories viz. Holdings with Crops and Livestock, Holdings with Crops only and Holdings with Livestock only. The number of such holdings along with area under the three categories of holdings are given in Table 2.13.

TABLE 2.13 : NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

Sr. No.	Category	Number of Holdings	%	Area (acres)	%
1	2	3	4	5	6
1	Holdings with Crops and Livestock	7,511	64.3	30,290	77.6
2	Holdings with Crops only	2,400	20.5	6,774	17.4
3	Holdings with Livestock only	1,770	15.2	1,940	5.0
		11,681	100.0	39,004	100.0

It is important to note that in Mannar district has considerable amount of holdings tend livestock (64%) with crops compared to other districts in the Island and also about 15 percent of the holding rare livestock only.

2.14 To get the complete picture of the holding, the information on the area of the holding was collected separately for the following:-

- a) Home garden
- b) Other highlands owned and cultivated by the operators.
- c) Other highlands owned by others but cultivated by the operators.
- d) Paddy lands owned and cultivated by the operators.
- e) Paddy lands owned by others but cultivated by the operators

The number of holdings reporting the above categories and area under each category are given in Table 2.14.

TABLE 2.14 : NUMBER AND AREA OF HOLDINGS BY CATEGORIES

Sr. No.	Category	Number *	Area (acres)	%
1	2	3	4	5
1	Home Garden	7,680	3,150	8.1
2	Other Highlands owned by the Operators	2,641	5,013	12.9
3	Other Highlands owned by others	304	766	2.0
4	Paddy lands owned by the Operators	6,285	26,145	67.0

6	Unspecified	330	08	Neg
	All Categories	11,681	39,004	100.0

\* A holding gets counted in more than one category since one or more categories reported in a holding. Therefore the addition of Column 3 exceeds the total number of holdings in the district.

In Mannar district, home gardens do not play an important role in the Agricultural Activities as in other districts in wet zone in the Island. Only 8 percent of the area is accounted for home gardens and also found that about 12 percent of the operated area is operated on tennancy basis (Column 3 & 5).

2.15 About 48 percent of the holdings and 28 percent of the area operated fall under the category of one type holdings. (See Table 2.15).

The Table 2.16 Indicates that about 78 percent of the paddy lands are operated solely on ownership basis which means that in these holdings they do not have any rented in paddy areas.

#### DISTRIBUTION OF PADDY LANDS BY SIZE OF PADDY LAND

2.17 The area reported under paddy in each holding have been regrouped according to the area of the paddy land and is given in Table 2.17.

The average size of the paddy holding in Mannar district is 4.3 acres. About 96 percent of the paddy holdings are above 1 acre in size and they account for about 99 percent of the area. One third of the paddy holdings in the district are 7 acre and above in size and the area accounted for respective group is about 62 percent of the total area under paddy.

#### CATTLE

2.18 At the time of Enumeration there were nearly 24,000 Cattle in the district out of which 69 percent were females and 31 percent males.

Table 2.18 -

## LIMITATION

2.20 The Statistical Tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District). The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
