CENSUS OF AGRICULTURE

KEGALLE DISTRICT REPORT

(SMALL HOLDING SECTOR)

DEPARTMENT OF CENSUS AND STATISTICS
MINISTRY OF PLAN IMPLEMENTATION

P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Kegalle is the fourth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

CHAPTER - 1

BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt. Lavinia which are predominantly residential and commercial areas.

1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

SMALL HOLDING SECTOR

FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

1. It has a dwelling house.
2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceding 1.7.1982. For livestock the reference period is as on 1.7.1982.

CHAPTER 2

A brief Review of the Results

Background

2.1 The Kegalle Administrative District is one of the two districts of Sabaragamuwa Province and is surrounded by four Administrative districts namely Gampaha, Ratnapura, Kandy and Kurunegala. Kegalle is the capital city of this district which is about 48 miles (77 Kilometers) from Colombo. This district has a land area of about 448,000 acres (1,693 Square Kilometers) with a population of 682,411 out of which 337,474 are males and 344,937 are females. About 83 percent of the population are in the rural sector while 7.8 percent are in urban sector. (Table 2.1) The district comprises of 9 Electorates, 10 Assistant Government Agent Divisions, 197 Grama Seva Niladari Divisions and about 1200 villages.

Divisions 31,510 acres and 20,399 acres respectively. In respect of the Small Holding Sector Warakapola A.G.A. division has the largest area while in other A.G.A. divisions have more than ten thousand acres each in the district.

Structure of Agriculture Holdings (Small).

2.6 The average size of the holding in Kegalle is 1.71 acres as compared to Island average of 1.94 acres. (Table 2.6).

Nearly 50 percent of the holdings are below one acre in size, although they cover only 12 percent of the area. Another 35 percent of the holdings are in the size class of 1 to 3 acres and cover 33 percent of the area.

Agricultural Operators by Age and Sex

2.7 About 39 percent of the operators are in the age agroup of 25 to 44 years and another 25 percent are in the age group of 45 years to 54 years.

Table 2.7 Agricultural Operators classified by Age and Sex

	Total	85,092	12,988	98,080	100.0

It is seen that about 34 percent (one third) of the operators are 55 years and above in age and also 13 percent of total number of operators are females in Kegalle district.

Agricultural Operators by Educational Attainment

2.8 Twelve percent of the operators in the district fall under the category of 'No schooling' (Table 2.8). The Island percentage of this category is also 12.7.

Table 2.8 : Agricultural Operators by Educational Attainment

Sr. No. 1	Level of Education 2	Total Number of Operators 3	Percentage 4
1	No Schooling	12,048	12.3

6	Higher academic qualifications	1,549	1.6
7	Unspecified	438	0.4
	Total	98,080	100.0

Within the district the percentage of operators with 'No Schooling' varies from 8.7 percent in Kegalle A.G.A. Division to 17.3 in Deraniyagala A.G.A. division. Only 0.9 of the operators (870 out of 98,080) were reported to be having professional qualification in Agriculture or Livestock in the district.

Area Owned

2.9 Nearly 8 percent of the operators do not own any land in the district and 42 percent owned only home gardens. (Table 2.9)

Table 2.9 : Area owned by type of Land Owned

Sr. No. 1	Type 2	No. of Operators 3	% 4	Area (Acres) 5	% 6

5	Unspecified	40	.0	-	-
	Total	98,080	100.0	143,674	100.0

The percentage of operators not owning any land varies from 3.5 in Warakapola to 13.5 in Deraniyagala A.G.A. Division. In terms of the area 57 percent is under category of "owning home garden and other lands". The average area owned by a operator is 1.6 acres, while average size of a home garden is 0.56 acres.

2.10 The distribution of operators owning land and area owned indicates that although there are 49 percent of land owning operators in the size class of less than 1 acre, they own only 13 percent of the total land owned. The average area owned in this size class is less than 1/2 an acre.

It is seen that the percentage of operators not owning any land to the total number is more than 80 percent in the holdings below 2 acres.

2.12 Ninty eight percent of the operational holdings are operated on own account basis.

Categories of Holdings

2.13 For tabulation purposes holdings were classified into three categories viz. Holdings with crops and Livestock (mixed holdings) holdings with crops only and holdings with livestock only. The number of such holdings along with the area is given in Table 2.13.

TABLE 2.13 NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

Sr. No.	Category	Number of Holdings	%	Area (acres)	%
1	2	3	4	5	6
1	Holdings with Crops and Livestock	28,405	29.0	62,070	36.9
2	Holdings with Crops only	68,349	69.7	105,413	62.8
3	Holdings with Livestock only	1,299	1.3	522	0.3
	All Categories	98,053	100.0	168,005	100.0

About 70 percent of the holdings in the district are only crop holdings. Only 1.3 percent of the holdings are purely livestock holdings.

2.14 To get the complete picture of holding, the information on the area of the holdings was collected separately for the following.

- a) Home garden
- b) Other highlands owned and cultivated by operators.
- c) Other highlands owned by others but cultivated by operators.
- d) Paddy lands owned and cultivated by the operators.
- e) Paddy land owned by others but cultivated by the operators.

The number and area of such categories is given in Table 2.14

TABLE 2.14 NUMBER AND AREA OF HOLDINGS BY CATEGORIES

* The holdings get counted in more than one category. Therefore the total number exceeds number of operational holdings.

One fourth of the agricultural lands of Small Holding Sector in Kegalle district is under home gardens. It is seen that only 14 percent of the lands operated do not belong to the operators and this can be taken as tenanted area. (categories 3 and 5). The average size of a home garden operated is slightly more than half an acre. (0.6 acres)

2.15 Table 2.15 gives data on holdings having only home gardens, only highlands and only paddy lands.

Sixty percent of the holdings in Kegalle district are one type holdings, accounting 39 percent of the total area under small holding sector. The special feature is that about 45 percent of total number of holdings consisted of only home gardens in the district.

Paddy Holdings by Type of Ownership

- 2.16 Total area under paddy and its break down whether it is purely owner cultivated or purely tenant cultivated or combination of both is given in Table 2.16. Somewhat similar information in a different form is also available in Table 2.14. From table 2.14 it will be seen that out of the total area under paddy 62 percent is owned and the rest is rented in paddy lands.

TABLE 2.16 - NUMBER AND AREA OF PADDY HOLDINGS BY TYPE OF OWNERSHIP

3	Having Paddy Lands owned by operators and others	3,093	8.9	3,988	16.5
All		* 34,585	100.0	24,192	100.0

The above table shows that 57 percent of the paddy lands are operated purely on a ownership basis. Twenty six percent of them are operated purely on rental basis which means in these holdings the operator does not own any paddy lands.

2.17 The area reported under paddy in each holding has been re-grouped according to the area of paddy land and given in Table 2.17.

The average size of a paddy holding in Kegalle is 0.7 acres. Nearly 78 percent of the paddy holdings are below 1 acre although they cover only 44 percent of the area.

Cattle

2.18 At the time of enumeration there were about 21,000 cattle in the district out of which 78 percent were females and only 22 percent were males. The age composition shows that about 63 percent were over three years of age.

From the composition of the cattle population, it is seen that about 90 percent of the cattle in the district is local bred and only 10 percent of them were either hibred or cross bred.

Buffaloes

2.19 The total number of buffaloes in Kegalle district was also nearly 21,000 out of which 68 percent were females and 32 percent were males.

Only 4.5 percent of the buffaloes population were either hibred or cross bred. The age composition shows that about 78 percent were over three years of age.

LIMITATIONS OF DATA

2.2o

The Statistical tables given in this report are based on the residence of the operators only: (open segment concept - Enumeration of operators residing within the District) The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
