## P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Kurunegala is the tenth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

## CHAPTER - 1

### BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

#### 1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

#### SMALL HOLDING SECTOR

##### FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

##### SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

## 6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

### ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

### 1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

#### AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

#### AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

#### HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

1. It has a dwelling house.
2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

#### LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. Land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

#### SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

#### ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

#### REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

## A BRIEF REVIEW OF THE RESULTS

## 2.1 BACKGROUND

The Kurunegala administrative district is located in the North-Western Province of Sri Lanka has a land area of about 1,186,000 acres. (about 4,800 square kilometers). Interm of the Number of Agricultural Operators and area under Agricultural Activities, Kurunegala district heads the list in the Island. The Census of Agriculture 1982 reveals that there are about 677,600 acres under Agricultural Activities in the district out of which 534,400 acres in the small holding sector and 143,200 acres (21%) in the Estate Sector. The annual average temperature of the district is about 27° centigrades and the rainfall varies from 70 - 100 inches. The predominant crop is coconut in the district which is also heads in the Island interms of acreage. According to the Census of Agriculture, 1982 the acreage under coconut was about 364,600 acres out of which 251,300 acres were in the small holding sector. Paddy is the second largest crop grown in the district. This district comprises of 14 Electorates, 17 Assistant Government Agent divisions 510 Grama Seva Niladari Divisions and about 3951 villages.

A total of 1,211,801 persons were enumerated in the district at the Census of population 1981 with a share of 96.4 percent rural population.

2.5 The number of Agricultural Operators and area operated by A.G.A. division is given in Table 2.5. The detailed analysis of the data pertaining to the Estate Sector has been given separately in the Report on Estate Sector published in March, 1984. The present report deals with the analysis of data on small holding sector only.

It is seen from the above table that the small holding sector plays the key role in terms of the operated area accounting for about 79 percent in the Kurunegala district. Bingiriya A.G.A. division has the largest area in the Estate Sector followed by Ibbagamuwa A.G.A. division.

#### STRUCTURE OF AGRICULTURE HOLDINGS (SMALL) OPERATIONAL HOLDINGS

2.6 The average size of the holding in Kurunegala is 2.44 acres as compared to Island average of 1.94 acres. (Table 2.6).

	Total	218,785	100.0	534,401	100.0

8 About twenty nine percent of the holdings are below one acre and they account for only about five percent of the area. On the other hand more than fifty percent of the holdings are in the size class of 1-4 acres accounting 42 percent of the total operated area in the district.

#### AGRICULTURAL OPERATORS BY AGE SEX

2.7 About 45 percent of the operators are in the age group of 25-44 years and another 28 percent of them are over 55 years of age.

TABLE 2.7 : AGRICULTURAL OPERATORS CLASSIFIED BY AGE AND SEX

Sr. No. 1	Age Group 2	Male 3	Female 4	Total 5	% 6

Total		189,315	30,217	219,532	100.0

It is seen that in Kurunegala district about 14 percent of the Agricultural Operators are females.

#### AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

2.8 About 11 percent of the operators have been reported under Category of "No Schooling". The majority of the operators are reported as passed grade 5 or less (46.2%).

TABLE 2.8 : AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

Sr. No. 1	Level of Education 2	Total Number of Operators 3	Percentage 4

## AREA OWNED

2.9 Fourteen percent of the operators in the district do not own any land while about 22 percent own only home garden.

TABLE 2.9 - AREA OWNED BY TYPE OF LAND OWNED

Serial No.	Type	No. of Operators	Percentage	Area Owned (acres)	Percentage

The average size of the area owned by an operator is 2.24 acres.

2.10 The distribution of operators owning land and area owned indicates that although there are about 29 percent of the land Owning Operators in the size class of less than one acre, they own only about 6 percent of the total area owned. The average area own in this size class is only half an acre.

About 61 percent of operators not owning any lands do operate the holdings below 2 acres in size.

2.12 The status of the operators in most of the holdings is on own account basis.

2.13 For Analytical purposes holdings were classified into three broad categories viz. Holdings with Crops and Livestock, Holdings with Crops only and Holdings with Livestock only. The number of such holdings along with area under the three categories of holdings are given in Table 2.13.

TABLE 2.13 : NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

Sr. No.	Category	Number of Holdings	%	Area (acres)	%
1	2	3	4	5	6

3	Holdings with Livestock only	3,174	01.5	2,901	0.5
All Categories		218,785	100.0	534,401	100.0

It is seen that little over half of the Agricultural Holdings in Kurunegala district are Crop holdings which means that they do not tend any Livestock.

2.14 To get the complete picture of the holding, the info. on the area of the holding was collected separately for the following.

- a) Home garden
- b) Other highlands owned and cultivated by the operators
- c) Other highlands owned by others but cultivated by the operators
- d) Paddy lands owned and cultivated by the operators.
- e) Paddy lands owned by others but cultivated by the operators

The number of holdings reporting the above categories and area under each category are given in Table 2.14.

About 24 percent of the holdings in Kurunegala district comprised with only home gardens although they account 8 percent of the total area.

2.16 The number and area of paddy holdings by type of ownership is given in Table 2.16.

TABLE 2.16 : NUMBER AND AREA OF PADDY HOLDINGS BY TYPE OF OWNERSHIP

	All Categories	116,574	100.0	153,371	100.0

It is seen that about 61 percent of the paddy holders cultivate paddy lands in their own with out rented in paddy lands while about 13 percent of the holders cultivate paddy lands owned by them with rented in paddy lands. It also can be seen from the Table 2.14 about 69 percent of the paddy lands are owned by the operators themselves, while the rest are on tenancy basis.

Note : \$ A holding gets counted in more than one category, since one or more categories have been reported in a holding. Therefore the addition of Column 3 exceeds the total number of holdings in the district.

Nearly 21 percent of the operated area in the district is operated on tenancy basis (Categories 3 and 5).

DISTRIBUTION OF PADDY LANDS

2.17 The area reported under paddy on each holding has been re-grouped according to the area of the paddy land and is given in Table 2.17.

The average size of a paddy holding in Kurumegala district is about 1.31 acres. Nearly 48 percent of the paddy holdings are below 1 acre and they account for only about 17 percent of the total paddy area.

CATTLE

2.18 At the time of enumeration there were nearly 214,000 cattle in the district out of which 63 percent were females and 37 percent males.

From the breed composition of the Cattle Population it is seen that only 3 percent of the cattle in the district are either highbred or crossbred.

### BUFFALOES

2.19 The total number of buffaloes in the District at the time of enumeration was 174,444 out of which 46 percent were females and 54 percent males.

Only one percent of the buffaloes in the district were crossbred or highbred. The age composition shows that about 22 percent of buffaloes were below three years.

### LIMITATIONS OF DATA

2.20 The Statistical tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District). The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
