

SRI LANKA
CENSUS OF AGRICULTURE
1982

BATTICALOA DISTRICT REPORT

(SMALL HOLDING SECTOR)

DEPARTMENT OF CENSUS AND STATISTICS
MINISTRY OF PLAN IMPLEMENTATION

P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Batticaloa is the seventeenth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

CHAPTER - 1

BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

SMALL HOLDING SECTOR

FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

- 1. It has a dwelling house.
- 2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. Land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

BACKGROUND

2.1 Batticaloa administrative district located on the Eastern Coast of Sri Lanka has a land area of about 663,000 acres (2686 square kilometers). According to the Census of Agriculture 1982 there were about 125,700 acres under agricultural activities out of which 118,000 acres were in the small holding sector. The predominant crop grown in the district is paddy accounted for about 92,000 acres which is about 78 percent of the total area of the small holding sector. The district comprised of 7 Assistant Government Agent divisions and 3 electorates.

At the time of Census of Population 330,333 persons were enumerated in Batticaloa district out of which 76 percent lived in rural areas.

About 64 percent of the population is under 24 years of age and has a sex ratio of about 103 males per 100 females.

The geographical distribution of the population among the A.G.A. divisions in the district is given in Table 2.3. Batticaloa has a density of 123 persons per square Kilometers. The district ranks eighteenth in terms of population among the districts in the Island.

NUMBER OF OPERATORS AND AREA OPERATED

The number of operators and area operated by A.G.A. divisions and by sectors is given in table. The detailed information pertaining to the Estate Sector has been given in the report on Estate Sector published in March 1984. This report deals with the analysis of data on small holding sector only. However some basic data on Estate Sector is given in the Annexure I.

TABLE 2.5 : NUMBER OF OPERATORS AND AREA OPERATED

Sr. No.	A.G.A. Division	Number of Operators			Area Operated (acres)		
		Estate Sector	Small Holding Sector	Total	Estate Sector	Small Holding Sector	Total

	District Total	106	46,364	46,470	7,572	118,168	125,740

It is seen that about 67 percent of the total operated area in Batticaloa district is accounted in three A.G.A. divisions namely Eravurpattu (34%) Korale Pattu (23%) and Manmunai Southwest (20%). The Small Holding Sector plays the keyrole in the district accounting for about 94 percent of the total operated area.

STRUCTURE OF AGRICULTURE HOLDINGS (SMALL)

2.6 The average size of the holding in Batticaloa is 2.55 acres as compared to Island average of 1.94 acres. (Table 2.6)

Total		46,364	100.0	118,167	100.0

About 48 percent of the holdings are below 1 acre in size although they account for about 5 percent of the operated area. Another 18 percent of the holdings are 5 acres and above in size and they account for about 30 percent of the operated area in the small holding sector.

AGRICULTURAL OPERATORS BY AGE AND SEX

About 53 percent of the operators are in the age group of 25 - 44 years and another 20 percent are above 55 years of age.

TABLE 2.7 : AGRICULTURAL OPERATORS CLASSIFIED BY AGE AND SEX

About 14 percent of the operators are females in Batticaloa district.

AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

The percentage of agricultural operators fall under category of "No Schooling" is high in Batticaloa district compared to other districts in the Island. It has been found that about 13 percent of the operators fall under this category for the Island where as 24 percent in Batticaloa.

TABLE 2.8 : AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

AREA OWNED

2.9 About 5 percent of the agricultural operators do not own any land while about 48 percent owned only homegarden.

TABLE 2.9 : AREA OWNED BY TYPE OF LAND OWNED

Sr. No.	Type	No. of Operators	%	Area (Acres)	%
1	2	3	4	5	6

2.10 The distribution of operators owning land and area owned by them indicates that out of the total area operated in the small holding sector about 90 percent operated on owned land basis. About 48 percent land owning operators do operate lands in the size class less than 1 acre, but they owned only about 8 percent of the total area owned in the district (see table 2.10).

TABLE 2.10 : DISTRIBUTION OF OPERATORS OWNING LAND AND AREA OWNED BY SIZE CLASSES

6	10 acres and above	4.6	3.9	4.3
All Classes		100.0	100.0	-

It is seen that about 46 percent of operators not owning any land do operate lands below one acre in size.

2.12 It is seen that more than 99 percent of the holdings and area in the district is operated on own account basis.

TABLE 2.12 : NUMBER AND AREA OF OPERATIONAL HOLDINGS ACCORDING TO THE OPERATIONAL STATUS OF THE OPERATOR

CATEGORIES OF HOLDINGS

2.13 For analytical purposes, holdings were classified into three broad categories viz. Holdings with Crops and Livestock, Holdings with Crops only and Holdings with livestock only. The number of such holdings along with area under the three categories of holdings are given in Table 2.13.

TABLE 2.13 : NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

Sr. No.	Category	Number of Holdings	%	Area (acres)	%
1	2	3	4	5	6
1	Holdings with Crops and Livestock	14,447	31.2	50,068	42.4
2	Holdings with Crops only	30,657	66.1	66,259	56.1
3	Holdings with Livestock only	1,260	2.7	1,841	1.5
All Categories		46,364	100.0	118,168	100.0

In Batticaloa district, about one third of the holdings do tend livestock while 2/3 of holdings grow only crops.

2.14 To get the complete picture of the holding, the information on the area of the holding was collected separately for the following:-

- a) Home garden
- b) Other highlands owned and cultivated by the operators.

- c) Other highlands owned by others but cultivated by the operators.
- d) Paddy lands owned and cultivated by the operators.
- e) Paddy lands owned by others but cultivated by the operators.

The number of holdings reporting the above categories and area under each category are given in Table 2.14.

* A holding gets counted in more than one category since one or more categories are reported in a holding. Therefore the addition of column no.3 exceeds the total number of holdings in the district. About three fourth (78%) of the operated area in Batticaloa district are under paddy lands while only about 10 percent of the area fall under home gardens. Fifteen percent of the area is operated on tennancy basis (col. 3 & 5).

2.15 About 64 percent of the holdings constitutes either only home gardens or only highlands or only paddy lands and they account for about 34 percent of the area under agricultural activities (see table 2.15).

PADDY HOLDINGS BY TYPE OF OWNERSHIP

2.16 Distribution of the paddy holdings by type of ownership is given in Table 2.16. Somewhat similar information in a different form is also available in Table 2.14 which indicates that 84 percent of the paddy area do operate on ownership basis while 16 percent on tennancy basis.

TABLE 2.16 : NUMBER AND AREA OF PADDY HOLDINGS BY TYPE OF OWNERSHIP

Sr. No.	Category	Number	%	Area (acres)	%

The above table indicates that about 79 percent of the paddy lands are operated solely by operators themselves which means in these holdings there is no rented in paddy lands.

DISTRIBUTION OF PADDY LAND BY SIZE OF PADDY UNIT

2.17 The area reported under paddy in each holding have been re-grouped according to the paddy area and is given in table 2.17.

The average size of a paddy holding in Batticaloa district is about 4.62 and this is relatively high compared to other districts in the Island. About 35 percent of the holdings are above 5 acres in size and they account for about 65 percent of the paddy area.

CATTLE

2.18 At the time of enumeration there were about 60,000 cattle in Batticaloa district out of them 68 percent were females and 32 percent males.

The bred composition shows that there are only 1 percent of the cattle population was either highbred or crossbred.

BUFFALOES

2.19 The total number of buffaloes in the District at the time of enumeration was 12,564 out of which 34 percent were males and 66 percent females.

Only about 2 percent of the buffaloes in the district were crossbred. The age composition shows that 36 percent of buffaloes were below three years of age.

LIMITATIONS OF DATA

2.20 The Statistical tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District). The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
