## P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Moneragala is the eighth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

## CHAPTER - 1

### BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

#### 1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

##### SMALL HOLDING SECTOR

##### FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

##### SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

## 6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

### ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

### 1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

#### AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

#### AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

#### HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

1. It has a dwelling house.
2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

#### LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. Land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

#### SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

#### ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

#### REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

A Brief Review of the Results

Background

- 2.1 The Monaragala administrative district is one of the two districts of Uva Province of Sri Lanka and is surrounded by the districts namely Badulla, Hambantota, Ampara and Ratnapura. Monaragala is the Principal Town of the district which is about 158 miles (253 km) from Colombo. This district has a land area of about 1,374,000 acres (5560 Sq. Kilometers) and it was found that only about 11.5 percent of land area is under agricultural activities according to the Census of Agriculture 1982.

Monaragala district has a population of 273,570 out of which 149,856 are males and 123,714 females. Only about 2.2 percent of the population live in Urban Sector while the rest in Rural Sector. (Table 2.1)

About 63 percent of the population is under 24 years of age and the district has a sex ratio of 121 males per 100 females.

- 2.3 Monaragala district ranks nineteenth in terms of population among the districts of the Island and the density is about 127 persons per square mile (49 per Square Kilometer) according to the Census of Population 1981. The Geographical distribution of the population among the A.G.A. divisions is given in Table 2.3. Buttala A.G.A. division has the highest population (23%) followed by Thanamalwila A.G.A. division (17%).

The activity rate worked out to 45.1 ( 67.4 for males and 16.7 for females). About 72 percent of the employed population is engaged in agricultural and allied activities.

Number of Operators and Area Operated.

2.5 The number of agricultural operators and area operated by A.G.A. division is given in Table 2.5. The detailed analysis of the data pertaining to the Estate Sector has been given separately in the report on Estate Sector published in March 1984. The present report deals with the analysis of data on small holding sector only. However, basic data of Estate Sector of this district is given in annexure 1.

Table 2.5 : Number of Operators and Area Operated

The largest number of Estates were found in Buttala A.G.A. division (16) followed by Monaragala A.G.A division (13) and 69% of the area under Estate Sector is also reported in those two A.G.A. divisions. In respect of the small holding sector Buttala A.G.A. division has the largest operated area in the district. The small holding sector which consists of about 85 percent of the operated area plays the vital role in the Agricultural activities in Monaragala district as compared to the Estate Sector.

Structure of Agriculture Holdings (Small)

2.6 The average size of the holding in Monaragala is 2.93 acres as compared to Island average of 1.94 acres. (Table 2.6).

Table 2.6 : Distribution of the Number and Area of Operational Holdings

Sr. No.	Size Class	No. of Holdings	%	Area (acres)	%

It is seen that about 51 percent of the holdings are between 2 - 4 acres in size and they account for about 43 percent of the operated area under small holdings. The holdings below half an acre in size is comparatively negligible in terms of area.

#### Agricultural Operators by Age and Sex

- 2.7 About 75 percent of the operators are in the age group of 25 - 54 years and another 18 percent of the operators are above 55 years of age.

Table 2.7 : Agricultural Operators Classified by Age and Sex

Total		41,984	4,190	46,174	100.0

Only about 9 percent of the operators are females in Monaragala district.

## Agricultural Operators by Educational Attainment.

- 2.8 About Twenty percent of the operators fall under category of 'No Schooling' and it is fairly high compared to the Island average of 12.7 percent. Nearly half the operators have reported as passed grade 5 or less in Educational Attainment.

Table: 2.8 : Agricultural Operators by Educational Attainment

Sr. No. 1	Level of Education 2	Total Number of Operators 3	Percentage 4
1	No Schooling	9,021	19.5

6	Higher academic qualifications	272	0.6
7	Unspecified	106	0.2

The percentage of operators with "No Schooling" varies from 14.9 percent in Thanamalwila A.G.A. Division to 24.9 percent in Madulla A.G.A. division.

Area Owned

- 2.9 Nearly 15 percent of the Operators do not own any land and about 41 percent own only home gardens (Table 2.9)

Table: 2.9 - Area Owned by Type of Land Owned

Sr. No.	Type	No. of Operators	%	Area (Acres)	%
1	Not Owning any land	6,958	15.1	-	-

4	Owning other land only	2,281	4.9	5,854	5.3
Total		46,174	100.0	110,362	100.0

The percentage of operators not owning any land varies from 1.8 percent in Bibile A.G.A. Division to 26.4 percent in Thanamalwila A.G.A. Division. The average area owned by an operator is 2.8 acres.

2.10 The distribution of operators owning land and area owned indicates that there are 21.6 percent of operators in the size class of 4 - 7 acres, but they own about 34 percent of total land owned.

Table: 2.10 Distribution of Operators owning Land and Area owned by size classes

§ The holdings get counted in more than one category. Therefore the total of coloum No. 3 exceeds the total number of holdings in the district.

The average size of a home garden in the district is 1.7 acres and it accounts for more than 50 percent of the area. It is seen that 12.6 percent of the Lands operated do not belongs to the operators and these can be taken as tenanted area. (Category 3 & 5).

2.15 Table 2.15 gives data on holdings having only home gardens, only highlands and only paddy lands.

Table: 2.15 - Number and Area of Operational Holdings having only  
Home Gardens, Only Highland and only paddy

Sr. No. 1	Category 2	Number 3	% 4	Area (acres) 5	% 6

Total under the three categories		24,652	55.3	49,613	37.4
Overall Total		44,625	100.0	132,473	100.0

Fifty five percent of the holdings in Monaragala district is one type holding and they account for about 37 percent of the total area under small holdings.

! Paddy Holdings by Type of Ownership

2.16 Total area under paddy and its break down by type of tenure is given in Table 2.16. Somewhat similar information in a different form is also available in Table 2.14. From the table 2.14. It is seen that out of the total area under paddy, 76 percent is owned and the rest is rented paddy lands.

Table: 2.16 - Number and Area of Paddy Holdings by type of ownership

Sr. No.	Category	Number	%	Area (acres)	%
1	2	3	4	5	6
1	Having Paddy lands owned by the operators	11,574	69.6	17,968	70.9
2	Having Paddy lands owned by others	4,079	24.5	4,869	19.2
3	Having Paddy lands owned by operators and others	980	5.9	2,511	9.9
Total		* 16,633	100.0	25,348	100.0

The above table shows that about 71 percent of the paddy area is operated purely on ownership basis which means that in these holdings there is no rented paddy lands.

DISTRIBUTION OF PADDY LAND

2.17 The area reported under paddy in each holding has been re-grouped according to the area of paddy land and given in Table 2.17.

Table 2.17 : Distribution of Paddy Land

The average size of a paddy holding in Monaragala district is 1.5 acres. Nearly 69 percent of the paddy holdings are over one acre in size and they account for about 91 percent of the paddy area.

### Cattle

2.18 At the time of enumeration there were 52,834 Cattle in the district out of which 62 percent were females and 38 percent males. The age Composition shows that about 61 percent were over three years of age.

Table: 2.18 - Number of Cattle by Type, Age and Sex

From the composition of Cattle population, it is seen that 97 percent of the Cattle in the district were local bred and only about 3 percent were either hibred or crossbred.

### Buffaloes

2.19 The total number of buffaloes in the District at the time of enumeration was 11,272 out of which 58 percent were males and 42 percent females.

Table: 2.19 - Number of Buffaloes by Type, Age and Sex

Only 5 percent of the buffaloes in the district were crossbred or hibred. The age composition shows that 72 percent of buffaloes were over three years.

#### Limitations of Data

2.20 The Statistical tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District) The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
