

SRI LANKA
CENSUS OF AGRICULTURE
1982

AMPARA DISTRICT REPORT

(SMALL HOLDING SECTOR)

DEPARTMENT OF CENSUS AND STATISTICS
MINISTRY OF PLAN IMPLEMENTATION

P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Ampara is the twenty first in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

CHAPTER - 1

BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

SMALL HOLDING SECTOR

FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

- 1. It has a dwelling house.
- 2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

4.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

A BRIEF REVIEW OF THE RESULTS

2.1 BACKGROUND

Ampara administrative district located on the South East Corner of Sri Lanka has a land area of about 1,074,000 acres (4,350 Sq. Kms.) The results of the Census of Agriculture 1982 indicates that there were about 155,000 acres under Agricultural Activities in the district out of which 133,000 acres in the small holding sector. Paddy is the predominant Crop grown in the district.

A total of 388,970 persons were enumerated at the time of Census of population 1981 out of which 86 percent concentrated in rural areas.

The age distribution shows that about 63 percent is under 24 years of age. Ampara district has a sex ratio of 110 males per 100 females.

The Geographical distribution of the population among the A.G.A. divisions in the district is given in Table 2.3.

NUMBER OF OPERATORS AND AREA OPERATED

2.5 Number of Agricultural operators and area operated by A.G.A. divisions is given in Table 2.5. The detail informations pertaining to the Estate Sector was given in the report on Estate Sector published in March 1984. This report deals with analysis of data on small holding sector. However basic information on Estate Sector is given in the Annexure I of this report.

About 40 percent of the Agricultural Holdings in the district have been enumerated as less than 1 acre in size and they accounted for only about 4 percent of the operated area. Another 20 percent of the holdings are 5 acres and over and they accounted for about 56 percent of the area.

AGRICULTURAL OPERATORS BY AGE AND SEX

2.7 About 56 percent of the Agricultural Operators have been enumerated in the age group of 25-44 years and another 17 percent are over 55 years of age.

In Ampara district about 12 percent of the Agricultural Operators are females.

AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENTS

2.8 About 22 percent of the operators were enumerated under the category of "No Schooling" and this is relatively a higher percentage compared to other districts and also to the Island average of about 13 percent.

TABLE 2.8 : AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

7	Unspecified	98	0.2
Total		58,903	100.0

Almost half of the Agricultural Operators have been reported as passed Grade 5 or less.

2.9 AREA OWNED

In Ampara district about 10 percent of the Agricultural Operators do not own any land while about 43 percent owned only home garden.

TABLE 2.9 : AREA OWNED BY TYPE OF LAND OWNED

2.10 The distribution of Agricultural Operators owning land and area owned according to the operated area is given in Table 2.10. In Ampara district, about 90 percent of the agricultural operators do operate owned lands and they claimed for about 86 percent of the total operated area in the district.

CATEGORIES OF HOLDINGS

2.13 For Analytical purposes holdings were classified into three broad categories viz. Holdings with Crops and Livestock, Holdings with Crops only and Holdings with Livestock only. The number of such holdings along with area under the three categories of holdings are given in Table 2.13.

TABLE 2.13 : NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

3	Holdings with Livestock only	4,638	7.9	2,401	1.8
All Categories		58,861	100.0	132,778	100.0

About 53 percent of the Agricultural holdings in the district are crop holdings which means in these holdings that they don't rare any livestock.

2.14 To get the complete picture of the holding, the information on the area of the holding was collected separately for the following:-

- a) Home garden
- b) Other highlands owned and cultivated by the operators.
- c) Other highlands owned by others but cultivated by the operators.
- d) Paddy lands owned and cultivated by the operators.
- e) Paddy lands owned by others but cultivated by the operators

The number of holdings reporting the above categories and area under each category are given in Table 2.14.

@ A holding gets counted in more than one category. Therefore the addition of the column 3 exceeds the total number of holdings in the district.

The average size of a home garden in Ampara district is nearly half an acre and about 19 percent of the total area operated in the district is under home gardens. About 16 percent of operated area do not belong to the operators and these can be taken as tenanted area. (Categories 3 & 5).

2.15 Table 2.15 gives data on holdings having only home garden, only highlands and only paddy lands.

About 56 percent of the holdings constitutes one category and the rest with two or more categories.

PADDY HOLDINGS BY TYPE OF OWNERSHIP

2.16 Total area under paddy and its break down by type of tenure is given in Table 2.16. Some what similar information in a different form is also available in Table 2.14. From Table 2.14 it is seen that out of the total area under paddy 84 percent is owned and the rest is rented in paddy lands.

TABLE 2.16 : NUMBER AND AREA OF PADDY HOLDINGS BY TYPE OF OWNERSHIP

The above table indicates that about 81 percent of the paddy land solely operated by the operators themselves and these holdings there is rented in paddy area.

DISTRIBUTION OF PADDY HOLDINGS

2.17 The area reported under paddy in each holding has been regrouped by size classes and is given in that Table 2.17.

Average size of a paddy holding in Ampara district was 3.2 acres and 75 percent of the paddy holdings are 3 acres and over in size and they accounted for about 92 percent of the total area of paddy in the district.

CATTLE

2.18 At the time of enumeration there were nearly 46,000 cattle population in the district out of which 56 percent were females and 44 percent males. The bred composition of the cattle population by sex and age is given in Table 2.18.

TABLE 2.18 - NUMBER OF CATTLE BY TYPE, AGE AND SEX

Nearly one third of the Cattle population was under 3 years of age and about 97 percent was in the category of local bred.

BUFFALOES

2.19 The total number of buffaloes in the district at the time of enumeration was about 16,000 out of which 43 percent were males and 57 percent females.

Only about 3 percent of the buffaloes in the district were crossbred or highbred. The age composition shows that about 26 percent of buffaloes were below three years.

LIMITATIONS OF DATA

2.20 The Statistical Tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District). The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
