CENSUS OF AGRICULTURE
1982

VAVUNIYA DISTRICT REPORT

(SMALL HOLDING SECTOR)

DEPARTMENT OF CENSUS AND STATISTICS
MINISTRY OF PLAN IMPLEMENTATION

P R E F A C E

A significant change in the planning process is taking place in several developing countries including Sri Lanka. The new approach envisages planning which commences at lower levels. Such an approach can succeed, however, only if a comprehensive data base is developed at lower levels.

The preparation of District Reports on the structure of agricultural holdings and their characteristics is one of the steps initiated by the Department of Census & Statistics to build up the required data base at the district level. The Report on Vavuniya is the twentyfourth in the series of such District Reports giving the main results of Census of Agriculture 1982.

With the completion of Census of Agriculture 1982, a complete frame of agricultural operators and agricultural holdings is available in the Department. This could be made use of for any future survey in the agricultural sector.

I am deeply grateful to the officers of the Department of Census & Statistics, the Government Agents and their staff, officers and officials of the Department of Agrarian Services for their assistance and to the farmers of Sri Lanka, who extended their fullest co-operation in conducting the Census and monitoring it to a successful conclusion.

CHAPTER - 1

BACKGROUND

1.1 The Census of Agriculture & Livestock 1982, covered the entire Island excluding the municipal areas of Colombo and Dehiwala-Mt.Lavinia which are predominantly residential and commercial areas.

1.2. METHODOLOGY & ITEM COVERAGE

Agriculture in Sri Lanka is carried on in two distinct sectors viz: (i) the estate or the plantation sector and (ii) the peasant or the small holding sector. The Census of Agriculture covered both the sectors.

SMALL HOLDING SECTOR

FIRST STAGE

The Census was carried out in two stages. At the first stage the enumerators visited each and every census unit namely, housing unit, living quarters other-than housing units and non-housing units in the country and screened out the agricultural operators through a schedule known as AC 1. After identifying the agricultural operators, the enumerators collected the following information in respect of their operational holdings through the schedule AC 2.

1. Characteristics of the Operators - Age, Sex and Educational Status.
2. Type of ownership of land.
3. Operational status of the operator.
4. Area of operational holding.
5. Area under principal crops.
6. Irrigated area and source.
7. Agricultural machinery.
8. Number of livestock.

SECOND STAGE

At the second stage a sample of 10% of the holdings have been selected and the following information was collected through the schedule AC 3.

1. Population of operator's household.
2. Sources of income of operator's household.
3. Main occupation of the operator.
4. Type of holding.
5. Use of fertilizer & pesticide.

6. Land utilization and tenurial pattern.

Two reports have been published so far in respect of the small holding sector. The first one is preliminary report based on the summary sheets furnished by the enumerator immediately after the field work. The second report is based on 10 percent sample tabulation and gives estimates on various characteristics of agricultural holdings. The present report which is based on 100 percent tabulation is one of the reports in the series of district reports proposed to be brought out.

ESTATE SECTOR

In the Agricultural Census, estate sector has been covered through a mailed questionnaire (AC 5). A set of questionnaires has been sent to all estates by the Commissioner of Census, asking the operators to complete and send these back. A detailed report on estate sector has already been published.

1.3 SOME CONCEPTS AND DEFINITIONS

A number of concepts were followed for conducting the Agriculture Census. These concepts have been discussed in detail in the report on Small Holding Sector published in 1984. Some of the important concepts however have been given in this report.

AGRICULTURAL OPERATOR

An Agricultural Operator is the person responsible for operating the agricultural land and or livestock. He may carry out the agricultural operations by himself or with the assistance of others or simply direct day to day operations.

This means that a person may attend to all the work needed to cultivate the and or tend livestock but will not be considered the operator if there is someone else directing day to day work on the holding. It also means that a person may supervise the work in a holding appearing for all purposes to be in charge of the operations of the holding but if there is someone else who is giving day to day directions, he does not become the operator.

The operator may himself cultivate the land and/or tend the livestock. He may do so with the assistance of labour hired or otherwise he may not do any physical labour at all but only direct day to day operations on the holding. It is important to note that the operator need not necessarily be the owner of land or livestock and also that mere ownership does not entitle a person to be considered as an operator.

In respect of livestock, any person who is actually responsible for the management of livestock in the same way that a land operator is responsible for his holding will be considered the operator. The livestock may be owned, obtained on "Ande" or lease or any other form of arrangement. While most livestock operators will also be land operators, there would be cases of livestock operators who are not land operators and therefore have no land holdings. The term agricultural operator includes both land operator

as well as purely livestock or poultry operator.

While most of the operators have only one holding, there could be cases of an operator having more than one holding.

AGRICULTURAL HOLDING

An agricultural holding consists of all land and/or livestock used wholly or partly for agricultural production irrespective of title, size, legal form or location and is operated under one operational status.

This means that it does not matter whether the land is one parcel or is composed of more than one parcel, whether the parcels are scattered and where they are located, whether in the same G.S. Division or not.

This also means that it does not matter whether the land is owned or not, whether the land is legally operated or not.

The requirements for considering it as a holding is only that it should be under one management and under one operational status.

An agricultural holding may be a purely land holding, land and livestock holding or purely a livestock holding.

HOME GARDEN

(a) A piece of land which has a dwelling house and having some form of cultivation can be considered as home garden if the total area of that piece of land is twenty or less than twenty perches.

(b) A piece of land which has some form of cultivation, the total area of which is more than twenty perches can also be considered as home garden if the following two conditions are satisfied.

1. It has a dwelling house.
2. The produce of the cultivated land in the home garden is largely for home consumption.

"Having some form of cultivation" will mean any cultivation for agricultural production will include even one coconut palm or arecanut palm if they are not too old to bear, or a couple of chilly plants etc. However, flower plants, wild trees, unproductive bushes will not be treated as cultivation for agricultural production.

LAND OWNED

Land owned for the purpose of the census means both land legally owned which would be the land over which the holder possesses title of ownership and consequently the right to determine to what use it should be put to as well as the right for transfer and land held in ownerlike possession.

4.

Land is said to be in ownerlike possession when the holder operates it in a ownerlike way even though he does not possess the title of ownership.

Some examples of ownerlike possession are :

1. Land operated under perpetual lease, hereditary tenure and under long term leases ranging from 30 to 40 years.
2. Land without legal title of ownership nor of a long term lease, has been peacefully and uninterruptedly operated by the holder for a period of 30 years without payment of rent.
3. Land owned by wife but operated by the husband who also is the operator. This land is considered owned by the operator in ownerlike possession.

SMALL HOLDING

An agricultural holding of less than 20 acres and under the same operational status was considered as a small holding. In some cases however a holding might consist of several parcels and the total area of these add together to 20 acres and above, this holding is still considered a small holding.

ESTATE

An agricultural holding of 20 acres in extent or more and under the same operational status was considered as an "Estate". There could be instances where different parcels of a holding add up to 20 acres or more. This was not considered as an estate. An estate should have at least one parcel where extent is 20 acres or above. Similarly holdings such as paddy lands of 20 acres and over are not considered as estates.

REFERENCE PERIOD

For the structure of agricultural holdings the reference period is the year preceeding 1.7.1982. For livestock the reference period is as on 1.7.1982.

A BRIEF REVIEW OF THE RESULTS

2.1 BACKGROUND

Vavuniya Administrative district one of the districts of Northern Province of Sri Lanka has a land area of about 486,000 acres (1967 square Kilometers). According to the Census of Agriculture 1982 there were about 68,626 acres under agricultural activities in the district out of which 66,769 acres in the small holding sector. The predominant crop reported in the district is paddy accounting for about 30,000 acres.

The total population enumerated in Vavuniya district at the Census of population 1981 was 95,428 with share of about 19 percent urban population.

About 62 percent of the population is less than 24 years of age and has a sex ratio of 114 males per 100 females.

The Geographical distribution of the population among A.G.A. divisions in the district is given in Table 2.3. Nearly 51 percent of its population was concentrated in Vavuniya South Tamil division.

2.4 The population aged 10 years and over by type of activity and sex in the district on the basis of 100 percent tabulations of the Census of Population is given in Table 2.4. The activity rate (i.e. the percentage of the population aged 10 years and over in the labour force to the total population) worked out to 45.6 (70.7 for males, 15.6 for females).

NUMBER OF AGRICULTURAL OPERATORS AND AREA OPERATED

2.5 The number of Agricultural operators by Sectors and A.G.A. divisions among the district is given in Table 2.5. This report only deals with the data pertaining to the small holding sector only. A details report on Estate Sector for the Island was published in March 1984. The following Table indicates that about 97 percent of the agricultural area belongs to the small holding sector in Vavuniya district.

Table 2.5 : Number of Operators Area Operated

STRUCTURE OF AGRICULTURE HOLDINGS (SMALL).

2.6 The average size of the holding in Vavuniya district is 4.57 acres as compared to Island average of 1.94 acres (Table 2.6). In this respect this is the highest recorded average among the districts in the Island.

Table 2.6 : Distribution of the Number and Area of Operational Holdings

12	20 and above	149	2.4	9,449	14.1
Total		14,612	100.0	66,769	100.0

The holdings less than 1 acre in size in Vavuniya district are very negligible in terms of number and area as well. About 43 percent of the agricultural holdings are over 3 acres in size and they accounted for about 65 percent of the operated area in the small holding sector.

AGRICULTURAL OPERATORS BY AGE AND SEX

2.7 About 54 percent of the agricultural operators in the district have been reported in age group of 25-44 and another 19 percent are over 55 years of age.

Table 2.7 : Agricultural Operators classified by Age and Sex

Total		13,372	1,268	14,640	100.0

Nearly 9 percent of the Agricultural operators in the district were females.

AGRICULTURAL OPERATORS BY EDUCATIONAL ATTAINMENT

2.8 About 15 percent of the Agricultural Operators have been reported under the category of "No Schooling" while nearly 50 percent have been reported as passed grade 5 or less.

Table 2.8 : Agricultural Operators by Educational Attainment

2.9 About 22 percent the operators have been claimed that they do not own any lands but the lands operated by them belongs to others.

2.10 The distribution of operators owning land and area indicates that 78 percent of the operators have their owned land's claiming for 84 percent of the operated area in the district. There were about 13 percent of the land owned operators operating over 10 acres in size and they accounted for about 15 percent of the total land owned in the district.

Table 2.10 : Distribution of Operators owning Land and Area owned by Size Classes

Sr. No.	Size Class	Number	%	Area Owned in acres	%	Average Size in Acres

		11,322	100.0	56,255	100.0	4.9

2.11 The percentage distribution of the total number of operators not owning any land and the percentage number of operators not owning any land to the total number of operators is given in Table 2.11.

Table 2.11 : Percentage Distribution of Operators not Owning land

Sr. No.	Size Class	Percentage distribution of total Number of operators	Percentage distribution of operators not owning any land	Percentage No. of operators not owning any land to total No. of operators in the Size class
1	2	3	4	5
1	Less than 1 acre	4.5	8.1	39.7
2	1 to less than 2 acres	14.2	23.5	36.3
3	2 acres to less than 4 acres	39.4	53.7	29.9

5	7 acres to less than 10 acres	8.6	2.6	6.5
6	10 acres and above	10.3	3.0	6.3
		100.0	100.0	

It is seen that nearly one four of the operators have been operated lands between 2 - 4 acres in the district while more than half of the operators not owning any land are in the same size class.

2.12 Following Table shows that about 99 percent of the operators and 99 percent of the area also have been operated on own account basis.

Table 2.12 : Number and Area of Operational holdings according to the operational Status of the Operator

4	In partnership	42	0.3	162	0.3
	Total	14,612	100.0	66,733	100.0

2.13 For Analytical purposes holdings were classified into three broad categories viz. Holdings with Crops and Livestock, Holdings with Crops only and Holdings with Livestock only. The number of such holdings along with area under the three categories of holdings are given in Table 2.13.

TABLE 2.13 : NUMBER AND AREA OF OPERATIONAL HOLDINGS BY CATEGORIES

Sr. No.	Category	Number of Holdings	%	Area (acres)	%
1	2	3	4	5	6
1	Holdings with Crops and Livestock	6,822	46.7	39,432	59.1

3	Holdings with livestock only	551	3.8	2,225	3.3
		14,612	100.0	66,730	100.0

Nearly half of the holdings do not rear livestock which means that they grow Crops only.

2.14 To get the complete picture of the holding, the information on the area of the holding was collected separately for the following:-

- a) Home garden
- b) Other highlands owned and cultivated by the operators
- c) Other highlands owned by others but cultivated by the operators
- d) Paddy lands owned and cultivated by the operators
- e) Paddy lands owned by others but cultivated by the operators

The number of holdings reporting the above categories and area under each category are given in Table 2.14.

@ Summation of the Column No. 3 exceeds the total number of holdings in the district since one or more categories have been reported in a holding.

Only about 5 percent of the operated area in the district was under home gardens and about 22 percent of the area operated on rental basis (Col.: 3 & 5)

2.15 It is seen that about 41 percent of holdings in Vavuniya district consisted with one category i.e. only home garden, or only highlands or only paddy lands and they accounted 34 percent of the area.

2.16 The number and area of paddy holdings by type of ownership is given in Table 2.16. Somewhat similar information in a different form is also available in 2.14. From Table 2.14 it can be seen that about 85 percent of the paddy area operated on ownership basis while the rest is rented in paddy lands.

The above Table indicates that about 81 percent of the paddy area operated purely on ownership basis which means that in these holdings there is no rented in paddy lands.

DISTRIBUTION OF PADDY LAND

2.17 Area reported under paddy in each holding has been regrouped according to the paddy area and is given in Table 2.17.

The average size of a paddy holding in Vavuniya district was 4.39 acres and about 30 percent of the paddy holdings were over 5 acres in size and they accounted for about 61 percent of the total paddy area.

CATTLE

2.18 At the Census of Agriculture 1982 there were 36,300 cattle population in the district out of which 74 percent females and 26 percent males.

Nearly 98 percent of the Cattle population were local bred.

BUFFALOES

2.19 The total number of buffaloes in the District at the time of enumeration was only about 1212 and their classification by type age and sex is given below:

TABLE 2.19 : NUMBER OF BUFFALOES BY TYPE, AGE AND SEX

About 30 percent of the buffaloes in the district were crossbred.

LIMITATIONS OF DATA

2.20 The Statistical Tables given in this report are based on the residence of the operators only. (open segment concept - Enumeration of operators residing within the District). The areas under crops are not given in this report since there may be agricultural lands in the district which are operated by operators residing in adjoining districts or elsewhere. Therefore the data relating to these areas would be available only when 100 percent tabulation is done in respect of all the Districts in the island. However the data users interested in crop areas could make use of the estimates given in the report on Small Holding Sector which are based on 10 percent sample tabulation.

Paddy being an important crop, area figures based on the residence of the operators are given. These area figures will undergo revisions when 100 percent tabulation is completed in respect of all the Districts.
